National Health Accounts (NHA) Estimates for India 2022-23 Latest News

The Health Ministry recently released the National Health Accounts NHA estimates for India 2022-23.

About National Health Accounts (NHA) Estimates for India 2022-23

- The NHA estimates, **released annually**, provide a **time-series analysis** of **actual health expenditure incurred by the government, private sector**, and other sources.
- The current estimates for 2022-23 mark the **10th edition** in the series that began in 2013-14.
- It is **prepared by the National Health Accounts Technical Secretariat (NHATS)** under the **National Health Systems Resource Centre, Ministry of Health and Family Welfare**, using the internationally accepted System of Health Accounts (2011) framework.
- **Highlights:**
 - The report indicates an **increase in government expenditure on healthcare since 2013-14.**

- The report showed that government health expenditure increased from **Rs 1.30 lakh crore in 2013-14 to Rs 3.85 lakh crore in 2022-23.**
- The **share of government health expenditure in the country's GDP** has **risen** from **1.15 percent in 2013-14 to 1.43 percent in 2022-23.** According to the new GDP series with base year 2022-23, the figure stands at 1.48 percent.
- Similarly, government health expenditure's **share in general government expenditure** has **increased** from **3.78 percent to 4.89 percent** over the same period.
- In **per capita terms**, government health expenditure has **increased nearly 2.7 times**, from **Rs. 1042 to Rs. 2786** between 2013-14 and 2022-23.
- The **share** of government health expenditure **in total health expenditure** has **increased by almost 15 percentage** points, from 28.6 percent in 2013-14 to **43.7 percent in 2022-23.**
- The increase in public spending has contributed to a substantial **decline in out-of-pocket expenditure incurred by households on healthcare.**
- **Out-of-pocket expenditure as a share of total health expenditure** fell from **64.2 percent** in 2013-14 to **43.4 percent in 2022-23.**
- The **share of Social Security Expenditure (SSE) in total health expenditure** — which includes government-funded health insurance such as the AB PM-JAY, medical reimbursements to government employees, and social health insurance programmes — has **increased substantially** from **6 percent in 2013-14 to 9.9 percent in 2022-23.**
- The **share of private health insurance in total health expenditure** has also **increased**, from **3.4 percent to 9.2 percent.**
- **Expenditure on primary healthcare by the government** more than **doubled** from Rs 0.5 lakh crore in 2013-14 to **Rs 1.4 lakh crore in 2022-23.**
