

Indian Space Association (ISpA), Vision, Objectives, Significance

July 22, 2026 • vajiramandravi.com

The **Indian Space Association (ISpA)** is the apex **non-profit industry body** established to promote the growth of India's **private space sector**. It acts as a bridge between the **Government, industry, startups, academia, and other stakeholders** to foster collaboration, innovation, and policy advocacy. Through its initiatives, ISpA aims to strengthen India's space ecosystem and position the country as a **global leader in the space industry** while supporting the vision of **Atmanirbhar Bharat**.

Indian Space Association (ISpA)

The **Indian Space Association (ISpA)** is the apex **non-profit industry body** representing India's **private space sector**. It serves as a bridge between the **Government, industry, startups, and other stakeholders** to promote collaboration, innovation, and policy advocacy. ISpA aims to strengthen India's space ecosystem and support the vision of **Atmanirbhar Bharat** by making India a **globally competitive space power**.

Indian Space Association (ISpA) Objectives

The **Indian Space Association (ISpA)** aims to strengthen India's **private space sector** by promoting **policy advocacy, innovation, industry collaboration, and capacity building**. It works to create a supportive ecosystem that encourages **investment, technological advancement, and global competitiveness** in the Indian space industry.

- Promote **policy advocacy** and ensure **ease of doing business** for the private space sector.
- Encourage **private sector participation** in all **space domain activities**.
- Support the **design, manufacturing, launch, and operation** of satellites, launch vehicles, and payloads.
- Foster **space-based applications** such as **satellite communication, navigation, remote sensing, and geospatial services**.
- Promote **research, innovation, technology development, and infrastructure creation**.
- Strengthen **capacity building** through **education, skill development and knowledge sharing**.
- Encourage **public-private partnerships** and collaboration among industry stakeholders.
- Facilitate **domestic and foreign investments** in India's space ecosystem.
- Build **international partnerships** and enhance cooperation with global space organizations.
- Support the vision of **Atmanirbhar Bharat** by developing a **self-reliant and globally competitive** Indian space industry.

Indian Space Association Functions

The **Indian Space Association (ISpA)** serves as the apex industry body for India's **private space sector**, facilitating collaboration between the **government, industry, academia, and global partners**.

- Acts as the **single voice** of the **private space industry** in India.
- Undertakes **policy advocacy** and provides recommendations on space-related regulations.
- Facilitates **coordination between the Government, ISRO, IN-SPACe, NSIL, and private companies**.
- Promotes **ease of doing business** by advocating for stable and industry-friendly policies.
- Encourages **research, innovation, and indigenous technology development** in the space sector.
- Supports the **design, manufacturing, launch, and operation** of satellites, launch vehicles, and payloads.
- Promotes **space-based applications** such as **satellite communication, navigation, remote sensing, and geospatial services**.
- Facilitates **technology transfer, knowledge sharing, and industry collaboration** across the space ecosystem.
- Organizes **seminars, workshops, conferences, and industry events** to promote awareness and networking.

Indian Space Association (ISpA) Significance

The **Indian Space Association (ISpA)** plays a vital role in accelerating the growth of India's **private space industry** by fostering collaboration between the **government, industry, startups, and research institutions**. It supports policy reforms, innovation, and investment, helping India emerge as a **globally competitive space**

power.

- Strengthens the **private space ecosystem** by representing the interests of industry stakeholders.
- Acts as a **bridge between the Government and private industry** for effective policy implementation.
- Promotes **ease of doing business** through industry-friendly policies and regulatory support.
- Encourages **innovation, research, and indigenous technology development** in the space sector.
- Supports **startups, MSMEs, and entrepreneurs** working in space-related technologies.
- Facilitates **public-private partnerships (PPPs)** for faster growth of the space ecosystem.
- Promotes **satellite communication, launch services, remote sensing, and space applications.**
- Attracts **domestic and foreign investments** to strengthen India's commercial space industry.
- Enhances **international collaboration** and expands India's presence in the global space market.
- Contributes to the vision of **Atmanirbhar Bharat** by building a **self-reliant, innovative, and globally competitive** space sector.
- Helps generate **high-skilled employment** and supports the growth of the **space economy.**
