INS Kadmatt Latest News

Recently, Indian Naval Ship INS Kadmatt, successfully completed a three-day port call at Surabaya, Indonesia.

About INS Kadmatt

- It is an indigenous stealth **anti-submarine warfare corvette**.
- It is the **second of four anti-submarine** warfare corvettes built for the Indian Navy by the Garden Reach Shipbuilders and Engineers of Kolkata **under Project 28**.
- It was commissioned into the **Indian Navy in January 2016**.
- The ship was inducted into **the Eastern Naval Command** of the Indian Navy.
- It has been named **after the Kadmat Island** of India's **Lakshadweep Islands**.
- **Role:** The primary role of the INS **Kadmatt is in anti-submarine warfare**—to protect ships in convoys and ports from enemy submarine attacks.

Features of INS Kadmatt

- The ship is fitted with **state-of-the-art weapons**, sensors, and machinery and is also designed to embark on the Sea king anti-submarine helicopter.
- The ship also has on-board early **warning, navigation**, and fire control radars, besides underwater sensors and integrated communication and electronic warfare systems.
- It produces low levels of **radiated underwater noise**, which reduces its chances of detection.
- It is equipped with anti-aircraft guns, torpedoes, and rocket launchers.
