

What is Trajan Gun?

January 19, 2025 • vajiramandravi.com

About Trajan Gun:

- It is a **155 mm towed artillery gun system**.
- It is jointly **developed by India and France**.
 - The gun is jointly developed by Larsen & Toubro (L&T) and KNDS France and has undergone rigorous testing by the Indian Army, meeting all qualitative requirements.
- The 52-calibre towed gun system is **manufactured in India**.
 - Several of its subsystems are indigenously developed like the auxiliary power unit, control panel, and rolling gear assembly.
- It is designed to meet the demands of modern combat, with a **range of over 40 kilometers** depending on the type of ammunition used.
- The Trajan's **modular design** makes it **easy to transport and deploy**, while its **automated loading system ensures rapid firing rates**.
- It is also capable of **operating in diverse terrains**, from marshy lowlands to high-altitude cold deserts.
- The system features **advanced targeting and fire-control systems**, which integrate seamlessly with modern military networks.

Q1: What is the meaning of artillery gun?

Artillery refers to large-caliber guns — guns with big barrels — which can be moved from one place to another for land battles. The artillery is also the name for the army unit that uses these big guns.
