FP-5 Flamingo Missile Latest News

Ukraine recently claimed that its domestically developed FP-5 Flamingo long-range missiles struck a key Russian defence manufacturing facility in the Volgograd region.

About FP-5 Flamingo Missile

- It is a **long-range, ground-launched cruise missile developed by Ukrainian** defense company Fire Point.
- It entered service in 2025.

FP-5 Flamingo Missile Features

- It has a reported 6-meter wingspan, and an estimated length of 12-14 meters excluding the pitot tube.
- It is designed to deliver a specified combat **payload of up to 1150 kg to strike ground targets** with fixed topographic coordinates at a **range of up to 3000 km**, both day and night.
- It is designed for **low-altitude flight to avoid detection**.

- It reaches a maximum speed of up to 950 km/h, with a cruising speed of 650 to 700 km/h.
- The missile is capable of **hitting a target even under conditions of active electronic interference.**
- It stands out for its **ease of use and low cost.**
- It does **not require expensive launch platforms**—its **launchers are reusable**, making deployment more economical.
